February 3, 2017

With the developing workforce becoming more mobile, it's important to make your working place inspiring and fun to be inside of. With large organizations like Google, LinkedIn, Facebook, and Snapchat, the modern workplace is always a topic of conversation that we see when initially designing our client's space. Even with the popular modern style that our clients want, it's important to make sure that your team can work more effectively and efficiently.

As a result of this, 2017 could be the year that will begin a revolution in workplace design. Here's why:

INTERCHANGEABLE LAYOUTS

In today's world, technology is rapidly changing to keep pace with the dynamic work environment. It is of utmost importance that the workplace is customizable and changes according to the task being done. Work Stations should be easily able to adapt to the changing work conditions and it the most important aspect which will be considered for designing office space in 2017. To design a workplace which works efficiently in future, you need to take some radical and unique decisions while choosing your office furniture.

FUTURE SUPPORTING DESIGN

For developing flexible layouts, you need to have furniture which will serve the demands of the new and changing workforce. You need to make smart choices which will help you to support an employee friendly, well-designed, and at the same time flexible workplace.

INTEGRATED TECHNOLOGY

You need to design your workplace so that can integrate with technology seamlessly. There is also the need to transform the workplace according to the modern trends such as cloud computing and wireless charging.

DESIGNED FOR DEVELOPMENT

In the recent times, modern architects and designers alike have promoted induced well-being as an integral part of the workplace design. As the health and increased productivity of the employees is of utmost importance, this sort of design will aid in the holistic development of the workforce at your

office. Such innovations in workplace design make sure that the productivity of your staff is very high.

OUTDOORS INSIDE

You need to create a workplace which brings in all the benefits of the outdoor environment into your place of work. Every office worker spends more than eight hours a day inside the four walls of your office. Hence, you need to bring the benefits of the natural environment into the workplace so that the employees do not feel cut off from the outside world. One such innovation is be living walls which add a part of nature to your workplace as a result of which there is increased air purity, freshness, and cleanliness in the office space.

WORK-BASED DESIGN

This technique combines two vital factors - The need for more privacy sometimes and improved collaboration during other times together in the same space. Some work places have open offices which promote teamwork among workers and at the same time maintains their privacy. For this reason, pods which are small, brightly colored cubicles have been introduced which help in removing background noise and prevent others from disturbing you.
