

## REDUCE YOUR SECURITY RISK WITH THE RIGHT SYSTEM

BY JOE ALLEN, SONITROL SECURITY OF DELAWARE VALLEY

DECEMBER 5, 2014

For most people, the holiday season is a time for grateful reflection. Criminals also celebrate with an increase in robbery attempts when they feel people are most vulnerable.

Holiday thefts can be avoided with the appropriate security plan and system. Our SonaVision verified video alarms insure rapid response, while eliminating false alarms.

Construction site theft is a major problem. It can range from anything that can be picked up and put in your pocket (tools and materials), to heavy equipment like back hoes and skid loaders. Next to back hoes and loaders, thieves go for compressors and generators.

Worrying about construction site theft is enough to make anyone who is responsible for job site security, stay up at night. What's required is a security plan that takes into account your job site and your specific situation, backed with budgeted funds for an effective construction site security system.

### Sonitrol Security solutions protect construction sites and outdoor fenced in areas.

Once the plan is developed our recommendation will be to use the best security system on the market today - SonaVision, is an advanced, real-time, heat and motion video monitoring technology, that we developed and pioneered for construction sites over the past 10 years.

SonaVision is hard-wired or wireless, integrated security solution that uses advanced video and motion detection equipment to create an electronic perimeter around the construction site perimeter. It uses audio and infrared, so we listen and see in the dark. When the system is armed it will sense any heat and movement that happens around the construction compound, so when it spots the movement of a person jumping the fence in the middle of the night, we can instantly see it's something bad, it's a verified break-in, so we dispatch the police immediately.

SonaVision is vastly superior to standard, digital recorder-based, monitored video, and static CCTV cameras that simply record video, because SonaVision detection is immediate and because it is a verified alarm, police will respond to ... quickly and without question. When the police arrive, and before the vandal can damage the property, or the thief steals a bobcat or copper wire, they are apprehended.

## “Building Successful Relationships” is our Mission.
