

## SPRING HVAC TIPS

Ed Hutchinson, President Hutchinson Mechanical Services

APRIL 2, 2015

With the harsh winter behind us, there's no doubt you're ready for the warmer weather. But is your HVAC system ready to handle the dog days of summer? Don't procrastinate and wait until something breaks down - it will only cost you comfort and dollars in the long-run.

Hutchinson Mechanical Services, a leading mechanical services contractor serving the Tri-State Region's commercial customers, offers tips to help add life to your HVAC systems, keep you feeling comfortable this season, and improve your bottom line.

- ▶ **Get an AC inspection and tune up.** Now's the time... don't procrastinate and wait until it's 80 degrees outside! Our certificated technicians will test your system to determine if any repairs are needed. Preventive maintenance will keep your system running smooth and efficiently, and extend its service life, too.
- ▶ **Swap out your air filters.** Rule of thumb is to change filters before every season at a minimum, and as needed.
- ▶ **Install programmable controls.** Employees won't have to worry or remember to adjust thermostats when they leave. Consider a 21st century control system, too for extra efficiency. With the click of a mouse, Honeywell Web Certified Hutchinson technicians can access heating and cooling controls over the web, enabling them to quickly access, monitor and repair any heating or cooling remotely.
- ▶ **Get your ductwork inspected and cleaned.** Leaks or cracks can reduce energy efficiency in your cooling systems and result in higher utility bills. A duct system that's properly sealed can save you money and make you more comfortable in your business.
- ▶ **Spring clean up around your HVAC units.** During the winter, leaves and debris can build up around units. Make sure to clear this away during your spring cleaning to give your unit at least two feet of clearance all the way around. This will help your unit function properly and safely.

Hutchinson is also a designated contractor of a program offered by New Jersey's Clean Energy program "Direct Install." Created specifically for existing small to medium-sized facilities, Direct

Install is a turnkey solution that makes it easy and affordable to upgrade to high efficiency equipment. Direct Install is designed to cut your facility's energy costs by replacing lighting, HVAC and other outdated operational equipment with energy efficiency alternatives. The program pays up to 70% of retrofit costs, dramatically improving your payback on the project.

Call 888-777-4501 to schedule a FREE energy assessment to see if you're eligible for Direct Install. Or email us at [DICoordinator@Hutchbiz.com](mailto:DICoordinator@Hutchbiz.com)
